

STEVE DIGIROLAMO

I truly care about web standards.

I always strive for W3C compliant markup. I am not the average developer in this line of work looking to make quick and easy cash, as I really do have a love for computers and programming. Do I know it all? Of course not, but I know a lot!

I can code many things and nothing about coding any project scares me :)

INTERESTS AND HOBBIES

Basketball

Gaming

Computers

BMX
